

WATERSHED-BASED
PLAN DEVELOPMENT

GRANT

develop a watershed-based plan
for best management practice
implementation and drinking water
source protection

Watershed-based plans (WBP) identify pollutants in a watershed, determine the source of pollutants, and describe what needs to be done to address each source. Once a watershed-based plan is in place, it becomes the guidance and framework for any water quality improvement activities in that watershed.

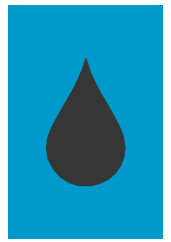

SC DEPARTMENT of
**ENVIRONMENTAL
SERVICES**

Basic Eligibility Requirements:

- Cover a watershed with a drinking water intake or surface source water
- Cover one to four 12-digit HUCs
- Address surface water pollutants that impact source water for drinking water systems

PLAN TO PROTECT & RESTORE YOUR WATERSHED

Let us fund your plan development

BEFORE

AFTER

Watershed-based plans include:

- EPA's nine elements
- stakeholder participation
- assessment of specific causes of impairments and sources of water quality problems
- identification of measurable water quality goals
- implementation of specific actions needed to solve those problems—point and nonpoint

Visit our [webpage](#) for more information about the WBP program.
