RE: D-0600
Duffies Pond Dam
Richland County

Dear Ms. Burnside,

On June 23, 1997 I conducted a routine reclassification check of your dam. I am enclosing a copy of my inspection report. The purpose of the inspection was to determine if the dam should be reclassified. Your dam is a Class 3, or low hazard. In order for your dam to be reclassified to a class 1, high hazard or class 2, significant hazard, new development or a high traffic road downstream must be present. For example, if a new home is built, or if an existing road downstream has increasingly more traffic, then you must notify our office so a reclassification check can be performed on your dam.

Provisions in the S.C. Dams and Reservoirs Safety Act require the owner to notify us within 30 days after transferring the title to their dam to someone else. The notification must include the name and address of the new owner. We are inclosing a blank form for your use in notifying us should the title of your dam be transferred.

Failure to respond to the above request may result in referral of the matter to the enforcement division of the department for appropriate action.

If you have any questions, please feel free to call me at (803) 935-7015.

Sincerely,

Kristine C. Hoskins
